

Forks of the Delaware Area

A Picture Album

Lafayette Collection
WYATT

Forks of the Delaware Area

By

Ronald W. Wynkoop, Sr.

A photo album with views of Easton and Phillipsburg during the late eighteen hundreds and the early nineteen hundreds with comparison photos taken in 1966. Easton scenes include: Centre Square, Northampton Street, South Side, College Hill, Island Park, Lehigh River, and many more.

Phillipsburg scenes include: Union Square, South Main Street, Morris Canal, Mt. Parnassus, Delaware River and Greens Bridge.

Special scenes include: Paxinosa Inn, The Orpheum Theatre, Trolley Cars, The Old Covered Bridge, and The Wreck of The Lehigh Valley Railroad's Black Diamond.

To the David Bishop Skillman Library
Lafayette College - March 14, 1966

ACKNOWLEDGMENT

I wish to express my sincere appreciation to the following friends for their valuable assistance toward making this project a success:

Mr. Harvey Morgenstern — Phillipsburg
Miss Constance Moy — Phillipsburg
Mr. Harry Spitznagle — Phillipsburg
Mr. John Vanderbilt — Warren Glen

FOREWORD

The photographs contained in this volume have been carefully selected to assure a greater coverage of the areas where the most noticeable changes have taken place throughout the years. So that these changes might easily be recognized and compared, an attempt was made to photograph each present-day scene from the spot where the photographers took their pictures many decades ago. Due to the presence of new buildings and the growth of thousands of trees, this task was most difficult.

While taking the pictures it was quite interesting to learn some of the history concerning many of these areas. For instance, Lafayette College first began on Canal Street in Easton, Pa., before moving to its present location where it would be free of danger if the Lehigh River overflowed its banks. Also, that the carousel in the amusement area at Island Park was later taken to Bushkill Park where it is still in use today.

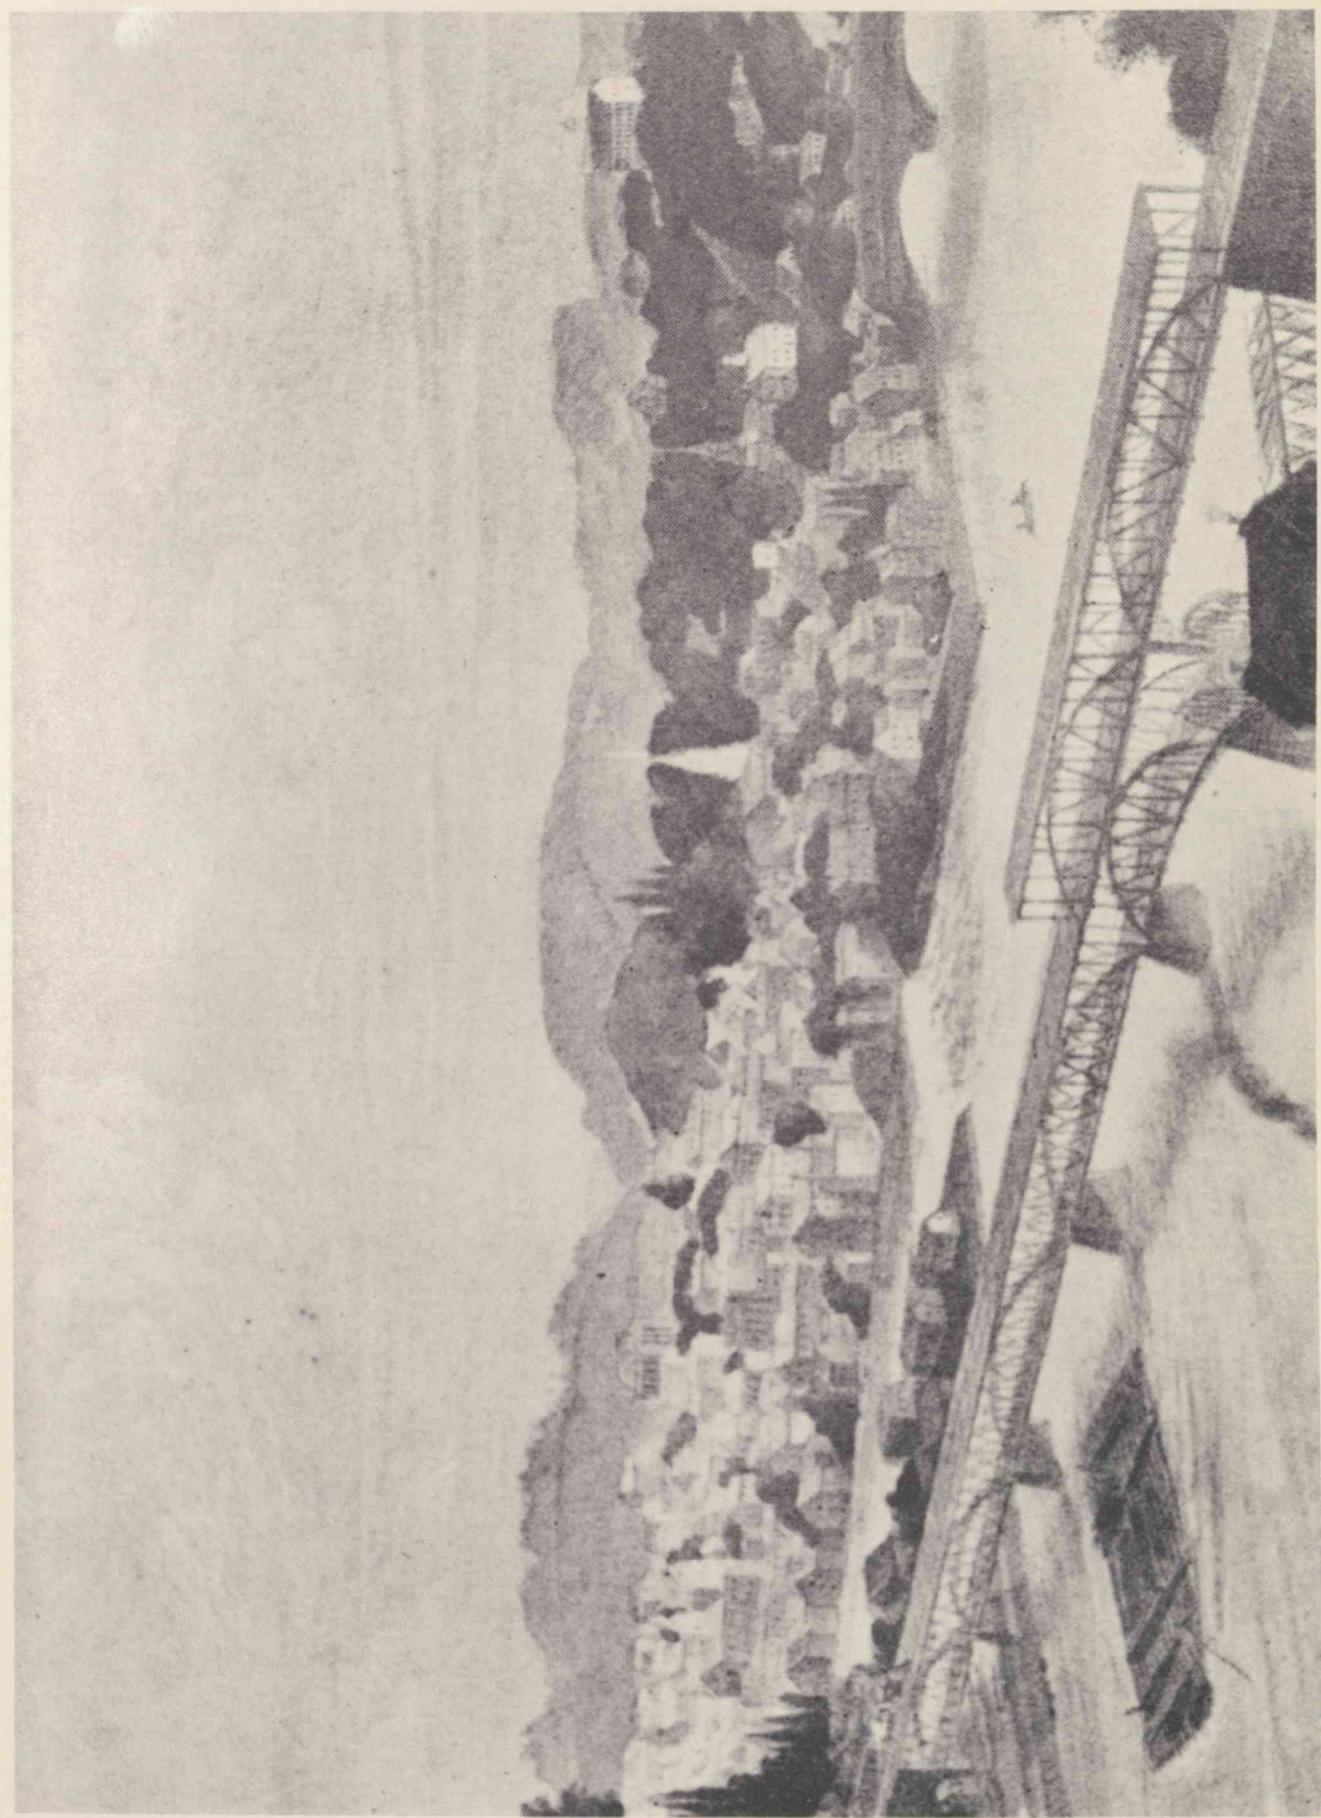

The present Lehigh and Hudson Railroad Bridge that crosses the Delaware River from Phillipsburg to Easton was once the shortest railroad in the country. It was known as the South Easton and Phillipsburg Railroad. It might be interesting to note that when a long freight train crosses this bridge it is in two states (New Jersey and Pennsylvania), two counties (Warren County and Northampton County), two towns (Phillipsburg and Easton), over two rivers (Delaware and Lehigh), over one canal (Delaware Canal), on three railroads (Lehigh and Hudson, Pennsylvania, and Central Railroad of New Jersey), on two bridges (Lehigh and Hudson and Central of N. J.), all at the same time.

A few hundred yards south of this bridge where the Central Railroad of N. J. and the Lehigh Valley Railroad bridges are located, once stood the first railroad bridge across the Delaware River at Easton. It was constructed of wood in 1856 and was double-decked. The upper level went straight through toward South Main Street in Phillipsburg and the lower level branched off on the Pennsylvania Railroad to the Morris Canal, just north of Mt. Parnassus.

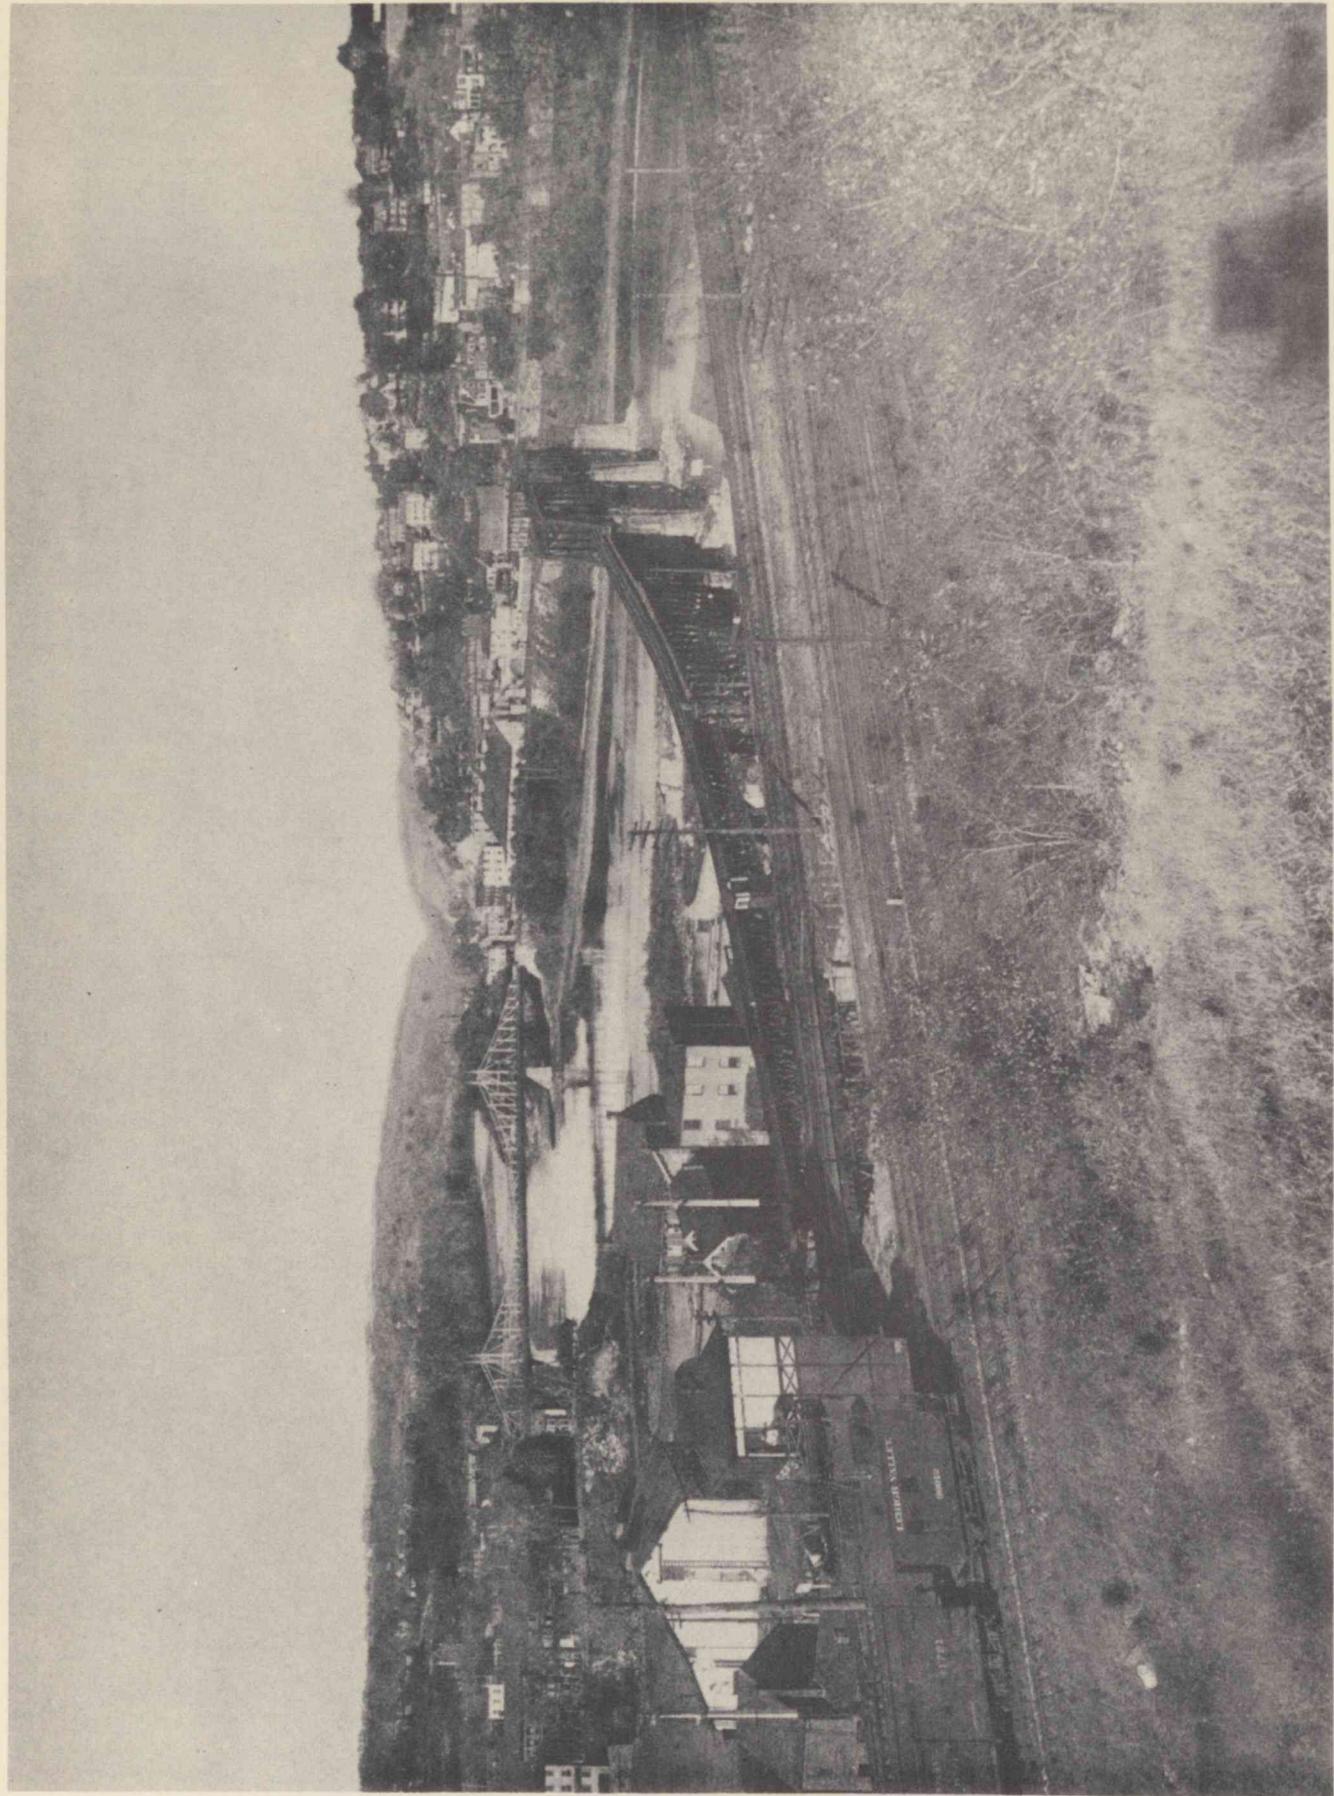

A special section of old photos also appears in this book along with the comparison photos. These pictures are scenes that were too difficult or totally impossible to photograph for comparison.

The Forks of The Delaware Area reveals "the good old days" in all its splendor, returning many fond memories to the senior citizen while young and old alike are made aware of the progress shown toward better living and traveling conditions.

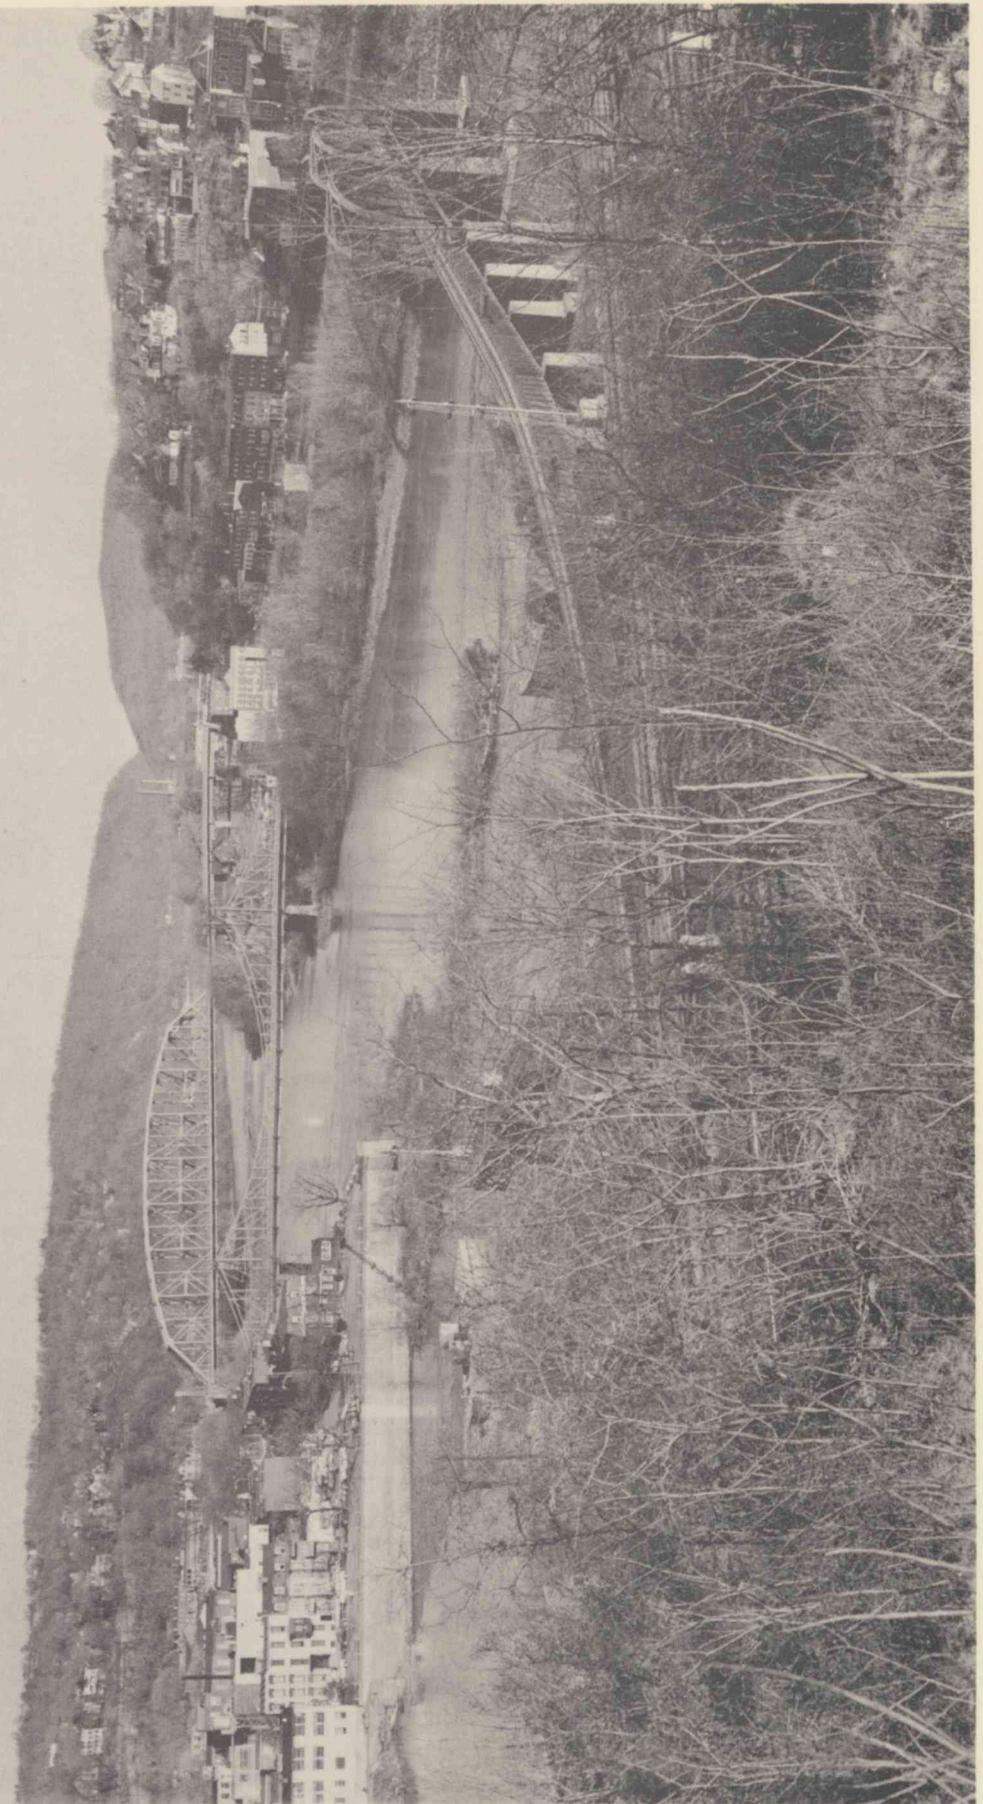

Ronald W. Wynkoop, Sr.
Phillipsburg, N. J.

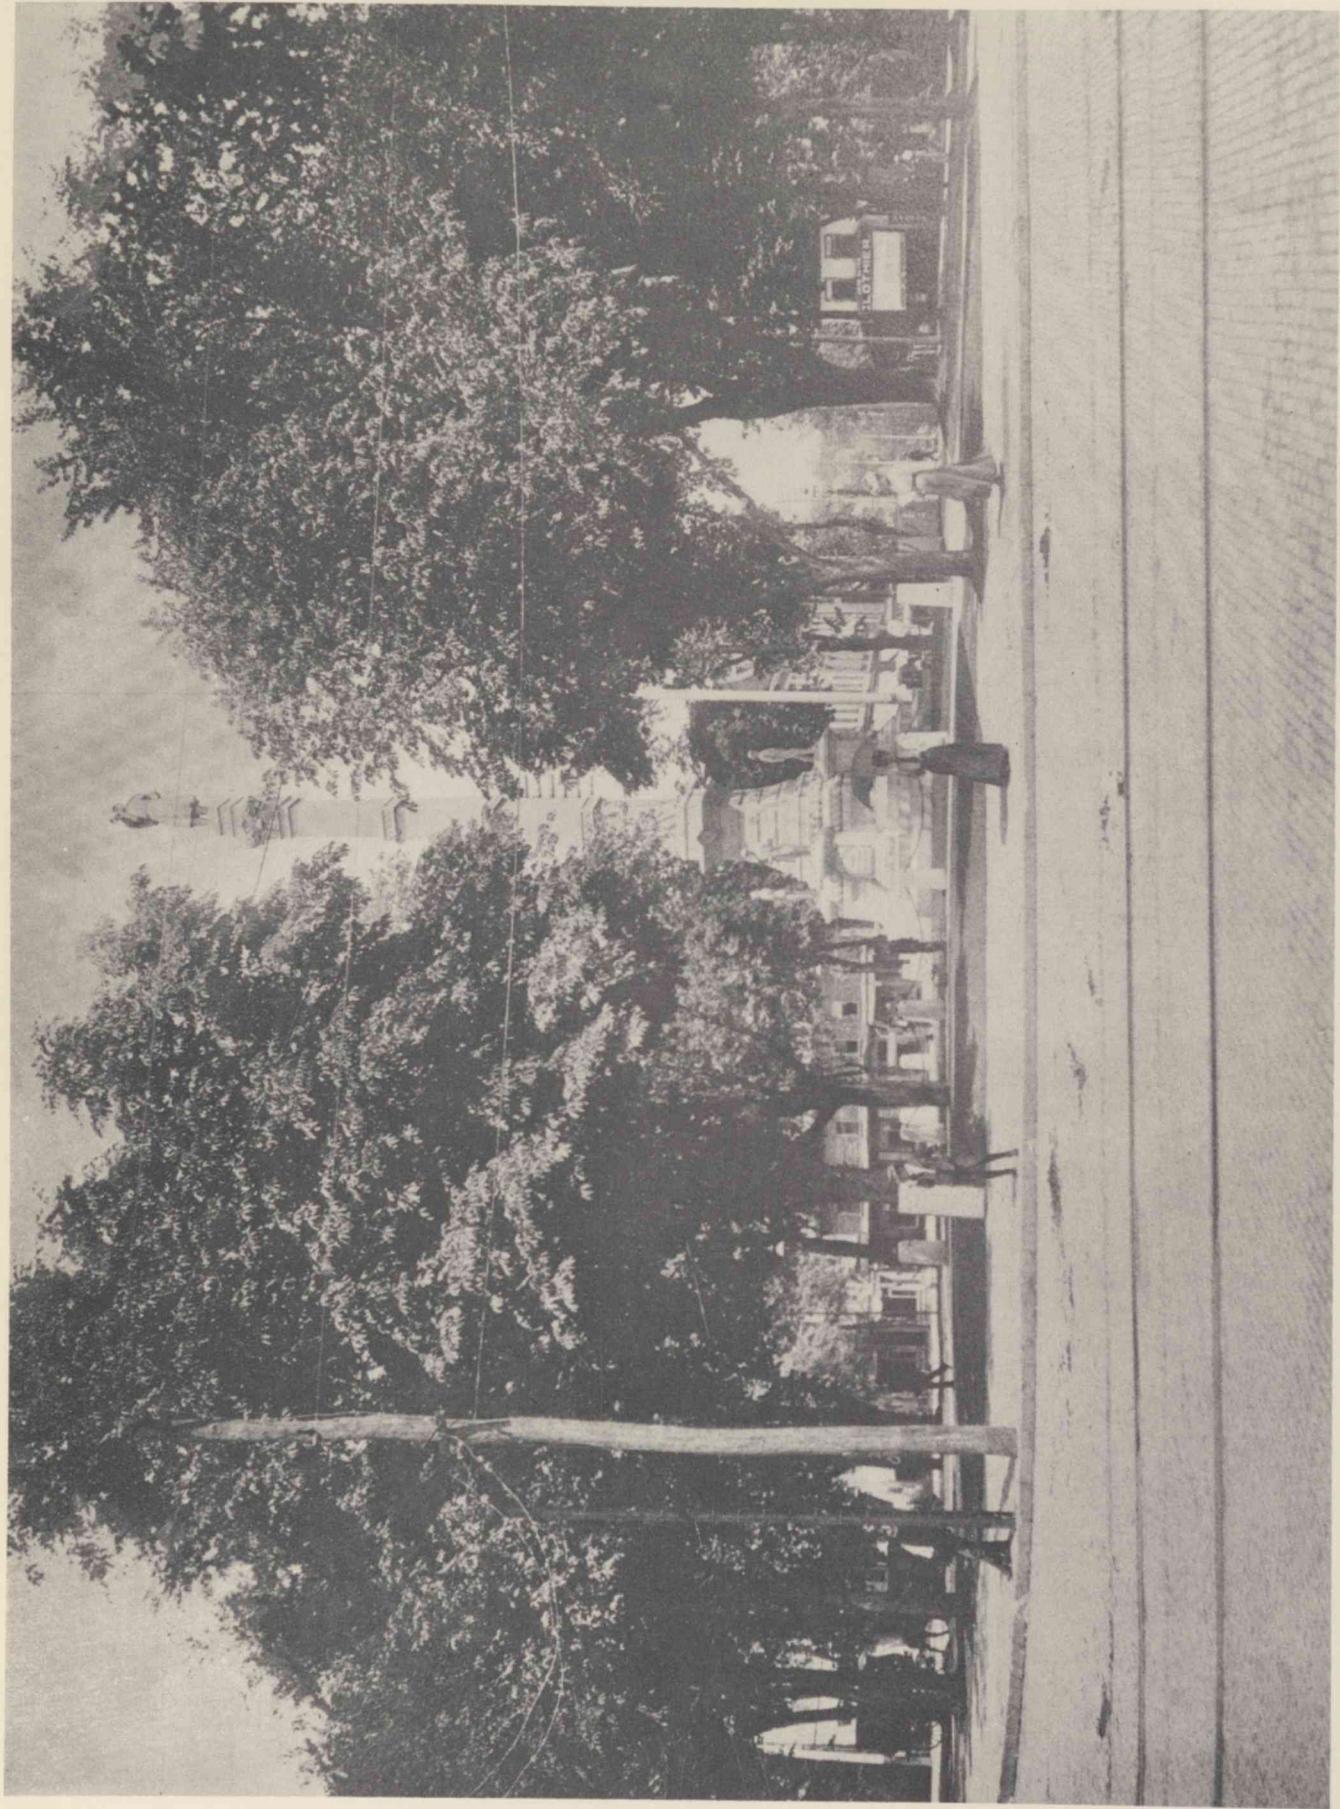

Forks of the Delaware sketch from Mt. Parnassus about 1857. "Double-deck" railroad bridge in foreground was built of wood in 1856 and was the first railroad bridge across the Delaware at Easton.
